To Whom It May Concern,

I am writing to provide assurance regarding the materials used in our products with respect to PFAS (Per- and Polyfluoroalkyl Substances) content. As a responsible and conscientious organization, we recognize the growing concerns surrounding PFAS in industrial products and are committed to addressing these concerns by maintaining the highest standards of safety and environmental responsibility.

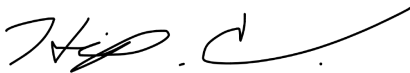

To the best of our knowledge and based on our most recent assessments, we can affirm that all wetted materials used in our products are free from PFAS compounds. We understand the significance of PFAS-related environmental and health risks and are dedicated to ensuring the safety and environmental compliance of our products.

Our commitment to PFAS-free materials extends throughout our entire supply chain. We work closely with our suppliers to ensure that the raw materials and components we source meet our strict criteria, and we continually review and enhance our materials sourcing and manufacturing processes to adhere to the latest regulations and industry best practices.

Environmental responsibility is a shared priority, and we believe that by offering PFAS-free products, we contribute to safeguarding the environment and the well-being of communities where our products are utilized.

Thank you for considering our commitment to PFAS-free products. We look forward to serving your needs and contributing to a safer and more sustainable future.

Sincerely,

Hipolito Camacho
